

World's first fully wireless access control system

Spintly is an access control manufacturer providing wireless access control system on a cloud-based platform

Mobile based access control and visitor management

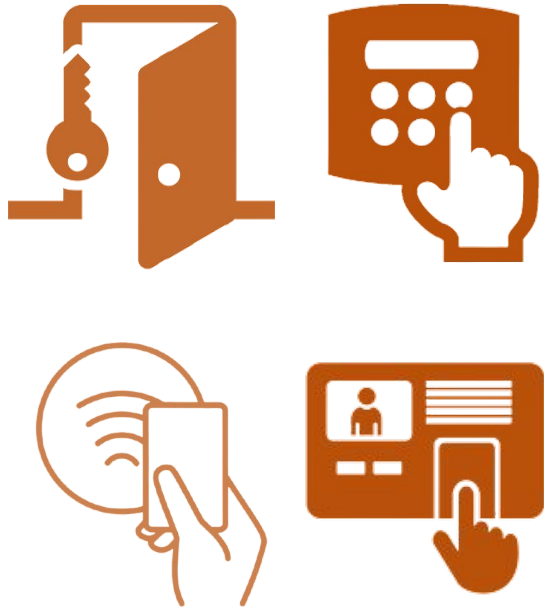

Eliminating wired infrastructure from the built world

Ideal for new builds and updating legacy infrastructure

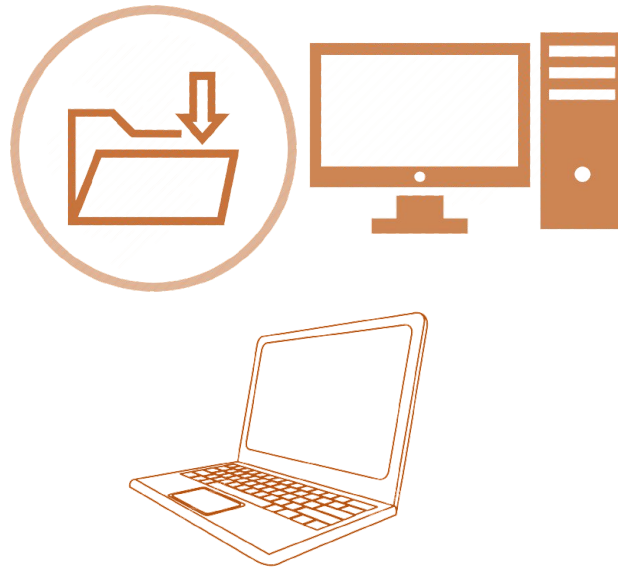

Company Overview

Problems in Traditional Access Control Systems

Inefficient Access methods

Local storage

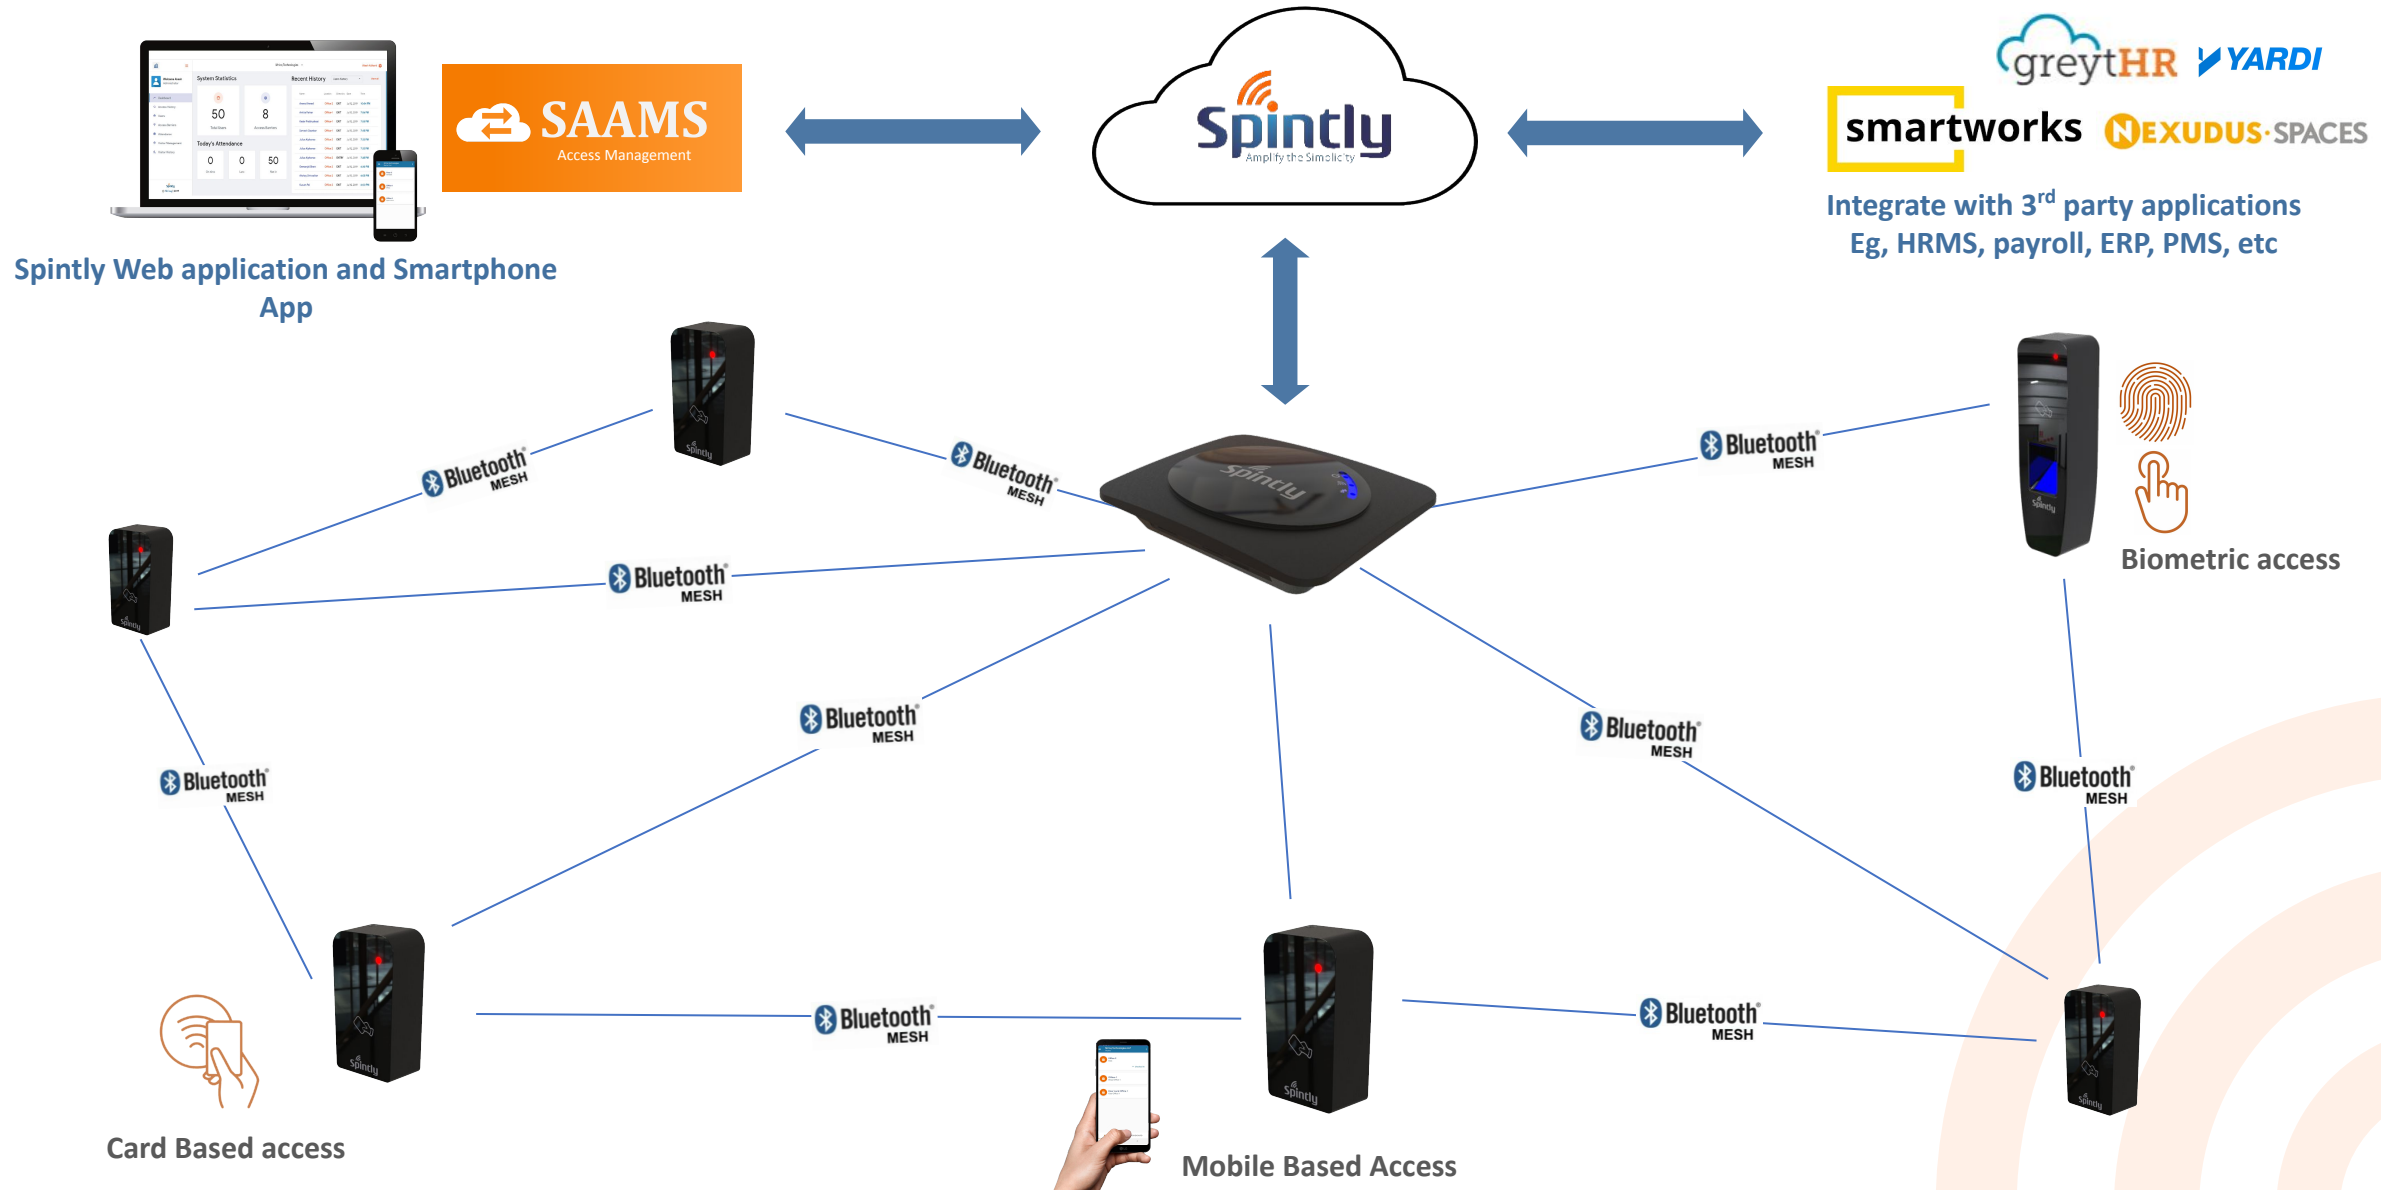

Excessive Cabling & hardware

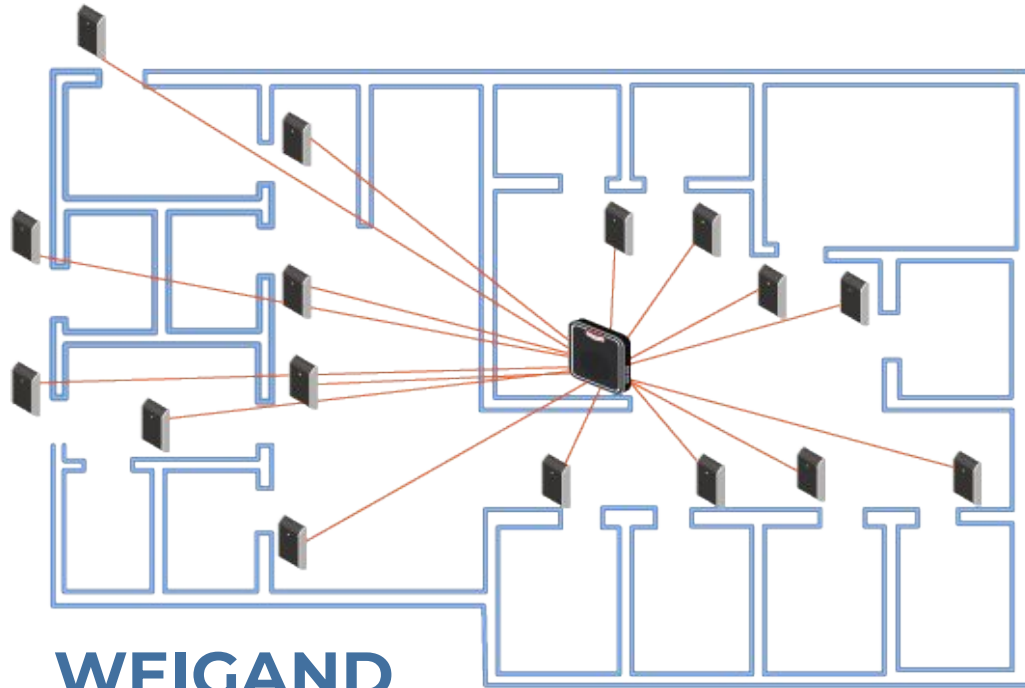

With COVID-19 it is no longer safe to touch things around you

Spintly Contactless & Wireless access control

A Paradigm shift in Access Control

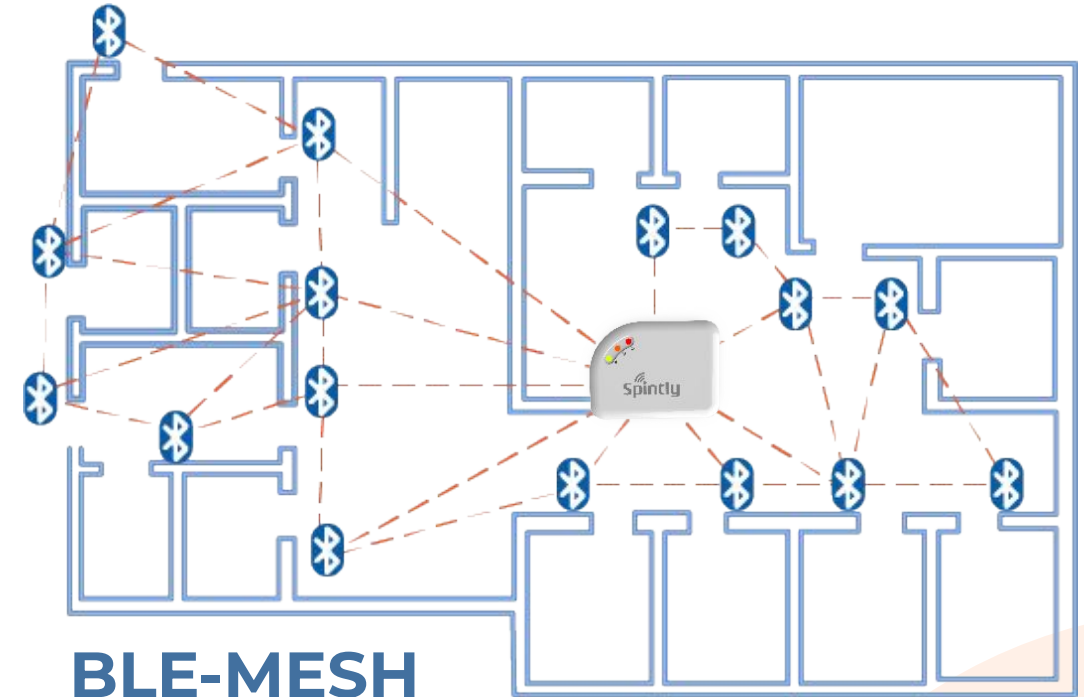

WEIGAND

Wired

- ❌ Excess wiring & labour intensive
- ❌ High installation cost
- ❌ Highly dependent on central controller
- ❌ Follows old security standards

Vs

BLE-MESH

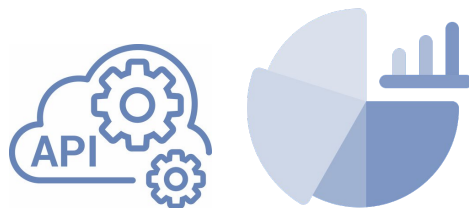

Wireless

- ✓ Minimum wiring for the door.
- ✓ Minimal installation cost
- ✓ Easy to install and retrofit
- ✓ Less dependent on central controller (gateway)
- ✓ Multiple levels of security & AES 128bit encryption

CONNECT YOUR PROPERTY TO THE CLOUD USING WIRELESS MESH

Move your access badges, Fobs and Keys into your smartphones and wearables

CLOUD BASED SOFTWARE FOR ACCESS MANAGEMENT

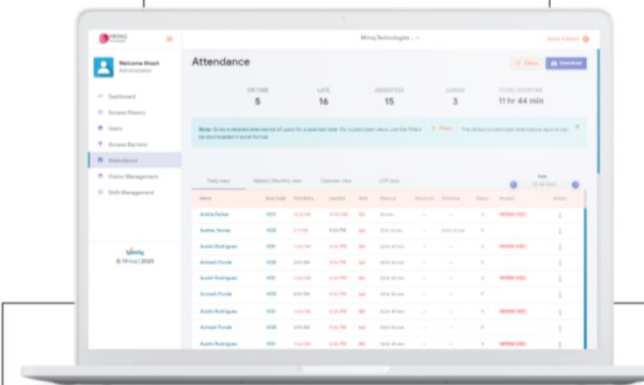

MANAGE YOUR COMMUNITY ACCESS WITH OUR POWERFUL SOFTWARE

Traditionally, a pen and paper-based attendance system were prevalent. It used to be time-consuming and is also subjected to human errors. It is a repetitive process and sometimes employees forget to check in and check out.

Spintly provides the most flexible, reliable and convenient Time and Attendance solution which allows employees to check-in with their favourite check-in method which include smartphones, access card or Biometric (Fingerprint and face recognition)

Attendance Reports
Generate real-time attendance reports and receive automated reports on e-mail or view the reports on the smartphone dashboard.

Leave Management
Employees can request their leaves through their app and managers can instantly approve the same on their smartphones.

Custom attributes
Create attributes relevant to your organization and generate custom reports as per your needs.

Shift Management
Create multiple shifts which can run in parallel and manage shifts using a shift roster with a user-friendly UI

BENEFITS OF CLOUD-BASED TIME & ATTENDANCE MANAGEMENT

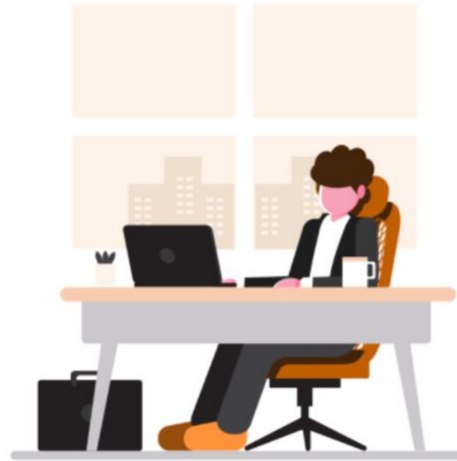

Check-in through Phone

The cloud-based system allows you to check in and out with the help of your smartphone. You do not need to carry another ID card or a key card

Location Capture

While checking in through your smartphone, the app can also track your location and store it. The system administrator can locate you anytime with the information

Payroll Integrations

Syncs attendance data with third party HRMS and Payroll software to streamline the payroll process

Leave and Absence Management

Employees can apply for the leave through the app and the request can be viewed by their managers instantly. Once approved it can instantly get filled in the timesheet

CONTACTLESS VISITOR MANAGEMENT
