

LOCATION	Lancaster, PA
ARCHITECT	Speedwell Design
DISTRIBUTOR	HC Quality Doors
GENERAL CONTRACTOR	Speedwell Construction
YEAR BUILT	2018

PDQ Manufacturing

By 2017, PDQ Manufacturing had outgrown its 48,000 SF manufacturing facility in Leola, PA. The company was so space constrained that most of the commercial hardware inventory was in off-site warehouses. In 2018 a new 80,000 SF building was constructed in Lancaster, PA, consolidating manufacturing and administrative functions. The new facility also added a showroom, additional warehouse space, an expanded keying department, and a state-of-the-art test lab. It was very important that every piece of hardware in the new building was a PDQ product. The new facility is the ultimate case study and a testament to PDQ quality, affordability and availability.
